Tapestry - Online Learning Journal

To document your child's learning journey, we use Tapestry, which is an online learning journal. The programme is used to track each child's progress through observation, which enables staff to plan exciting and stimulating activities and also to set targets.

We feel the programme is very beneficial for our setting in terms of assessing the children and tracking their progress. Tapestry links in with the EYFS curriculum and allows us to choose statements linked to your child's learning and progress.

With your permission, we will register you on Tapestry with one of your email addresses and a password. Once you have logged on, set your pin and organised your settings as you would like them, you can view your child's observations that we have completed and uploaded. We will complete and upload observations as and when opportunities arise. Please do not expect to see a new observation on a daily basis as we may have gathered evidence elsewhere (e.g long observations, art work, printed photographs, recorded activities and worksheets)

It is really important that we continue to share information about your child and using Tapestry is a fantastic way of doing so. You, as parents, can also add observations to your child's profile.

If you would like a demonstration of using Tapestry, or wish to discuss the programme in further detail, please meet with us or visit <https://tapestry.info/parents-carers.html> for more information.

Kind regards,
The Early Years Team
